

$$p_{n+1} = p_n + \frac{1}{2}(k_1 + k_2)$$

$$k_1 = h v(p_n), \quad k_2 = h v(p_n + k_1)$$

- **Integrate** along representative vectors emanating from singularities
- **RK-Heun**: 2nd-order accurate, stable near singularities
- **Terminate** on boundary, singularity, or c_0 corner

Code: `StreamlineGenerator_v2.runge_kutta_heun_integrate_streamline` *Lit:*
